## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, 15, and 17 are, drawn to a three-dimensional nonwoven filter fabric, classified in class 210, subclass 503 and 508.
  - II. Claims 9 14, drawn to a method of making a three-dimension fabric, classified in class 264, subclass 219 and 239.
  - III. Claim 16, drawn to a mold, classified in class 249, subclass 105.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be made by forming the nonwoven fabric by spinning semi-molten fibers, letting the fibers cool to form a flat nonwoven and then molding the flat nonwoven to form a three-dimensional fabric, instead of extruding the fibers directly onto the mold.
- 3. Inventions III and I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product could be made by forming the nonwoven fabric by spinning semi-molten fibers, letting the fibers cool to form a flat nonwoven and

then molding the flat nonwoven to form a three-dimensional fabric, instead of extruding the fibers directly onto the mold.

- 4. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the mold can be used to reshape a flat nonwoven fabric instead of forming a fabric directly on the mold.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenna-Leigh Befumo whose telephone number is (703) 605-1170. The examiner can normally be reached on Monday - Friday (8:00 - 5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (703) 308-2414. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
